

B760™ FUELTECH® Premium Drive Retread

*Designed for Tandem Axle Tractors in Truckload
and Less-Than-Truckload Applications*

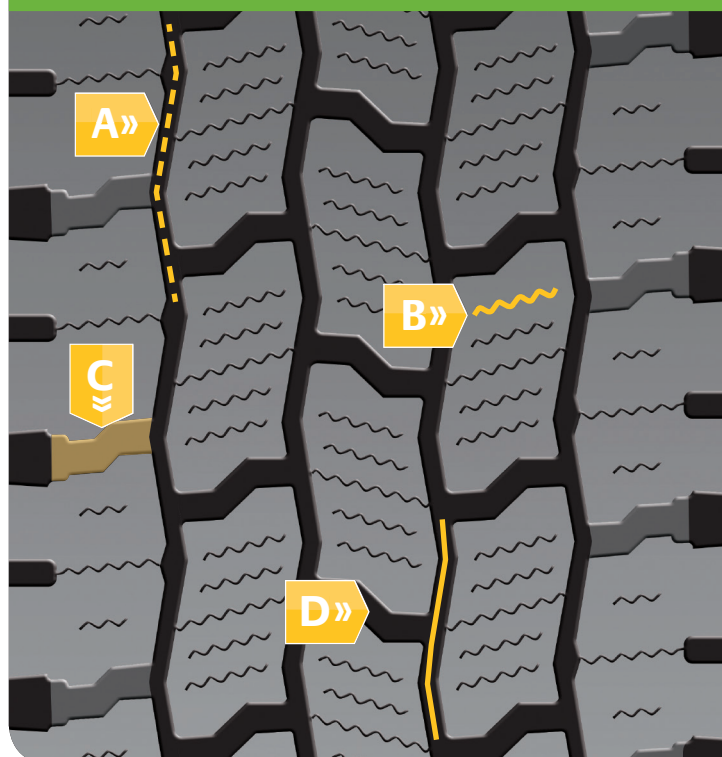

Long Life ■ Strong Traction ■ SmartWay® Verified

FARTHER THINKING

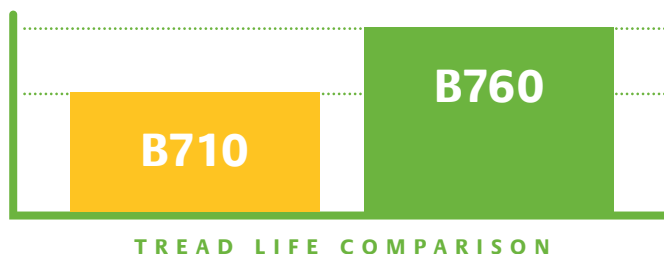

The Bandag B760 FuelTech® drive retread was specifically engineered to complement the Bridgestone M760 Ecopia™ radial tire. The advanced tread design and proprietary compound deliver longer wear life than the ultra-fuel-efficient Bandag B7 10™ FuelTech. Couple that with a highly siped design that delivers traction in all conditions and you have a SmartWay verified retread that offers a balance between tread life, traction and fuel efficiency. It's a new kind of thinking that will help you keep a firm grip on your bottom line.

- A Optimized Groove Width**
Helps combat the retention of casing-damaging stones and improves drilling resistance, leading to increased casing life.
- B Highly Siped Tread Design**
Provides strong traction on wet and dry surfaces.
- C Tie Bars**
Control movement of tread blocks for long, even wear.
- D Multiple Gripping Edges**
Help promote traction.

Up to 20% Longer Wear Life Than Bandag B710™ FuelTech

*Advanced tread design
and proprietary compound
deliver longer life*

Maximize your casing returns with Bandag. Bandag retreads represent a total, no-compromise tire solution that delivers strong performance, real cost savings and a proven way to extend the life of your valuable casing assets.
